examples of thinking and practice across the spectrum of education and training sectors both formal and informal The book adds to the increasing body of literature that recognises that education is and must be in its praxis at the heart of all the SDGs As we enter the third decade of the 21st century we have a clear understanding of the wicked and complex crises regarding the health of life on our planet and we cannot ignore the high levels of anxiety our young people are experiencing about their future Continuing in the direction of unsustainable exploitation of people and nature is no longer an option if life is to have a flourishing future The book illustrates how SDGs are supported in and by education and training showcasing the conditions necessary to ensure SDGs are fore fronted in policy reform It includes real world examples of SDGs in education and training contexts as well as novel critiques of the SDGs in regard to their privileging of anthropocentrism and neoliberalism This book is beneficial to academics researchers post graduate and tertiary students from all fields relating to education and training It is also of interest to policy developers from across disciplines and government agencies who are interested in how the SDGs relate to education
