**Advanced Computing Concepts and Techniques in Control Engineering** Michael J. Denham, Alan J. Laub, 2013-06-29 Computational concepts and techniques have always played a major role in control engineering since the first computer based control systems were put into operation over twenty years ago This role has in fact been accelerating over the intervening years as the sophistication of the computing methods and tools available as well as the complexity of the control problems they have been used to solve have also increased In particular the introduction of the microprocessor and its use as a low cost computing element in a distributed computer control system has had a profound effect on the way in which the design and implementation of a control system is carried out and to some extent on the theory which underlies the basic design strategies The development of interactive computing has encouraged a substantial growth in the use of computer aided design methods and robust and efficient numerical algorithms have been produced to support these methods Major advances have also taken place in the languages used for control system implementation notably the recent introduction of Ada a language whose design is based on some very fundamental computer science concepts derived and developed over the past decade With the extremely high rate of change in the field of computer science the more recent developments have outpaced their incorporation into new control system design and implementation techniques

**Algorithms in Advanced Artificial Intelligence** R. N. V. Jagan Mohan, B. H. V. S. Rama Krishnam Raju, V. Chandra Sekhar, T. V. K. P. Prasad, 2025-05-23 Algorithms in Advanced Artificial Intelligence is a collection of papers on emerging issues challenges and new methods in Artificial Intelligence Machine Learning Deep Learning Cloud Computing Federated Learning Internet of Things and Blockchain technology It addresses the growing attention to advanced technologies due to their ability to provide paranormal solutions to problems associated with classical Artificial Intelligence frameworks AI is used in various subfields including learning perception and financial decisions It uses four strategies Thinking Humanly Thinking Rationally Acting Humanly and Acting Rationally The authors address various issues in ICT including Artificial Intelligence Machine Learning Deep Learning Data Science Big Data Analytics Vision Internet of Things Security and Privacy aspects in AI and Blockchain and Digital Twin Integrated Applications in AI

**Technical Innovation in Financial Economics: Advanced Theory, Practice, and Policy** Chen, Haojun, 2025-09-08 In economics technical innovation has transformed the way markets operate and conduct business With the advancement of computational models the way

businesses reevaluate economic theories has changed and expanded for the better These innovations enhance the efficiency transparency and predictive capabilities of financial systems offering new tools for managing risk pricing assets and understanding market behavior This evolving landscape not only challenges long standing paradigms but also creates opportunities for more dynamic and responsive economic policies and strategies Technical Innovation in Financial Economics Advanced Theory Practice and Policy explores how technological advancements have changed economic theory This book brings together researchers and experts in the field of operational research and decision support to share their latest research findings exchange ideas and discuss challenges and opportunities in the field Covering topics such as economic theory finances and advancements this book is an excellent resource for anyone interested in operational research from both theoretical and practical perspectives

Proceedings of the 8th International Conference on Advanced Intelligent Systems and Informatics 2022 Aboul Ella Hassanien,Václav Snášel,Mincong Tang,Tien-Wen Sung,Kuo-Chi Chang,2022-11-17 This proceedings book constitutes the refereed proceedings of the 8th International Conference on Advanced Intelligent Systems and Informatics AISI 2021 which took place in Cairo Egypt during November 20 22 2022 and is an international interdisciplinary conference that presents a spectrum of scientific research on all aspects of informatics and intelligent systems technologies and applications

**Design With Ai Without Losing Your Taste** Raphael Westwick,2025-10-17 Artificial intelligence can accelerate your creative process but it shouldn't erase your individuality Design With AI Without Losing Your Taste teaches artists designers and creative professionals how to harness AI as a collaborator not a replacement This book walks you through the process of using AI tools for brainstorming sketching and refining ideas while maintaining control over aesthetics emotion and intent Learn how to build critique loops that use AI feedback to sharpen not dilute your signature style From crafting effective prompts and curating reference moodboards to analyzing visual output critically you'll discover practical workflows for keeping your creative voice authentic in the age of automation Through real world examples design frameworks and mindset shifts Design With AI Without Losing Your Taste helps you establish an intelligent partnership with your tools one that amplifies intuition rather than imitation Whether you're a hobbyist exploring new creative tools or a professional building client ready concepts this book gives you the language process and confidence to use AI while staying true to your artistic identity

Bioinspired Strategic Design Daniel J. Finkenstadt,Tojin T. Eapen,2024-07-08 Organizations are commonly thrust into hostile operating environments where they are required to make strategic decisions that involve significant and costly tradeoffs Such hostile environments may be endemic such as an economic recession or idiosyncratic such as a predatory action by an adversary Many features of such hostile environments parallel those of living organisms that also demonstrate fine tuned strategies to improve their survivability under adverse conditions How can organizations use these bioinspired strategies to survive and even potentially innovate This book shows that the same three capabilities essential for the survival of living organisms in harsh environments efficiency resilience and

prominence are also critical for organizations in their process of navigating through their own hostile environments Throughout the book the authors provide organizational executives with a systematic framework for thinking about strategic decision making in a hostile environment leaning on analysis of real world cases to draw out ontologies and methods for guiding their teams through disruptions change management innovation and process improvements In the first part organizations are provided with a systematic approach to analyzing three survivability influences forces resources and observers and their interrelationships While all three influences are active across all organisms and organizations the exact nature of their interrelationship and the significance of each influence are unique to every organism or organization The framework helps organizations nail down the specific features of their operating environment that can help or hinder survivability by analyzing the three influences Organizations can respond to external influences by developing three pronged capabilities efficiency resilience and prominence ERP that respond to the three survivability influences Organizations often struggle with identifying the appropriate strategies to apply under different conditions Fortunately nature provides several mechanisms that can be analogically applied to guide business strategies The book contains many illustrations and examples of strategic principles observed among living organisms that can help an organization develop ERP capability Finally the book introduces seven strategic design heuristics Combination Elimination Separation Segmentation Replication Dynamics and Maximization observed in a living system that can be flexibly utilized to generate ideas to achieve strategic ends
