Discovering God and His Creation Carl R. Turner M.D, 2008-10-13 Is there evidence for the existence of God Is evolution true and if so is evolution compatible with Christianity These questions face not only students each year but also our modern society as a whole The answers to these questions are important because they will determine our understanding of nature and our relationship with God Dr Turner in his book *Discovering God and His Creation* focuses on these two questions He tells of his lifelong journey in the worlds of faith science and evolution and what he has discovered as he searched for answers He outlines the overwhelming evidence for both the existence of God and evolution and explains how nature cannot be understood without evolution He reveals that the solution to the faith and science dilemma lies in a deeper understanding of the Christian belief that God is a father Dr Turner s journey began with the influence of a father and after completion of graduate studies in evolutionary biology and medical school ended with his realization that evolution is more compatible with Christianity than any other explanation for nature The reasons behind Dr Turner s conclusion are enlightening and will provide a long sought for answer to the standoff between faith and science
