Spellman, 2023-06-15 Taking a staff led approach this book helps libraries of all types create their own meaningful and authentic strategic plans while demystifying a process that can bring many benefits to the organization With dwindling budgets to pay for consultants and a growing interest in collaboration across the organization libraries are increasingly taking a do it yourself approach to strategic planning This book takes a step by step approach to grassroots strategic planning for libraries of all types The authors who led a successful strategic planning process at their own library provide practical advice and detailed information to guide library personnel through their own process Topics include aligning with institutional and community values creating vision and mission statements researching stakeholder needs conducting environmental scans collaborative drafting of the plan communication strategies and implementation and assessment of the plan Each chapter helps librarians create a strategic plan for a broad spectrum of libraries including K 12 post secondary public and special libraries A unique feature of the book is its emphasis on the ways in which different library types can collaborate to meet shared goals This book is a one stop shop providing everything library staff will need to create a strategic plan without searching for additional sources

Analogical Thinking in Architecture Jean-Pierre Chupin, 2023-07-27 This book provides an in depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking representations from the 1960s to the present day the second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and

theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text
