Change We Must Matthew Goldstein, George Otte, 2019-09-05 A former chancellor and a lineup of stellar educators offer plans and ideas for making education work better for everyone College is too expensive for too many Politicians call for more financial support but approve less Underpaid overworked adjuncts teach vastly more than the star faculty members who drew students to campus Departments and administrations focus more on protecting their territories than on pedagogy or even management Technology is extolled and resisted hyped as the force that will utterly transform or deform education It seems clear that the American system of higher education is broken In a series of essays collected and edited by Matthew Goldstein credited with reviving the vast City University of New York and George Otte Director of Academic Technology at CUNY well respected and innovative educators offer solutions to the fiscal administrative pedagogical technical and political problems Among the solutions Break the centuries old models of brick and mortar education and replace it with online peer led and adaptive learning Re envision governance so even reluctant faculty and administrators can once again become invested in education rather than self interest Find innovative ways of promoting the changes American education so desperately needs including figuring out when and where students are most likely to learn With essays from such thought leaders as Cathy N Davidson Candace Thille Ray Schroeder James Hilton and Jonathan R Cole **Change We Must** is a must read for anyone wanting American higher education to succeed and thrive in these challenging times **McGraw-Hill's**

Linden, 2017-03-31 Drawing on the work of internationally acclaimed experts in the field **Handbook of Item Response Theory** Volume Two Statistical Tools presents classical and modern statistical tools used in item response theory IRT While IRT heavily depends on the use of statistical tools for handling its models and applications systematic introductions and reviews that emphasize their relevance to IRT are hardly found in the statistical literature This second volume in a three volume set fills this void Volume Two covers common probability distributions the issue of models with both intentional and nuisance parameters the use of information criteria methods for dealing with missing data and model identification issues It also addresses recent developments in parameter estimation and model fit and comparison such as Bayesian approaches specifically Markov chain Monte Carlo MCMC methods **In Whose Name?** Armin von Bogdandy, Ingo Venzke, 2014-07-24

The vast majority of all international judicial decisions have been issued since 1990 This increasing activity of international

courts over the past two decades is one of the most significant developments within the international law. It has repercussions on all levels of governance and has challenged received understandings of the nature and legitimacy of international courts. It was previously held that international courts are simply instruments of dispute settlement whose activities are justified by the consent of the states that created them and in whose name they decide. However, this understanding ignores other important judicial functions, underrates problems of legitimacy, and prevents a full assessment of how international adjudication functions and the impact that it has demonstrably had. This book proposes a public law theory of international adjudication which argues that international courts are multifunctional actors who exercise public authority and therefore require democratic legitimacy. It establishes this theory on the basis of three main building blocks: multifunctionality, the notion of an international public authority, and democracy. The book aims to answer the core question of the legitimacy of international adjudication in whose name do international courts decide. It lays out the specific problem of the legitimacy of international adjudication and reconstructs the common critiques of international courts. It develops a concept of democracy for international courts that makes it possible to constructively show how their legitimacy is derived. It argues that ultimately international courts make their decisions even if they do not know it in the name of the peoples and the citizens of the international community.

Rutter's Child and Adolescent Psychiatry and Psychology Anita Thapar, Daniel S. Pine, Samuele Cortese, Cathy Creswell, Tamsin J. Ford, James F. Leckman, Argyris Stringaris, 2025-08-11. Up to date edition of a leading textbook on child and adolescent psychiatry with new information on COVID 19, digital technology, and more. Both interdisciplinary and international in scope, Rutter's Child and Adolescent Psychiatry delivers an expansive overview of the current state of the field, covering the latest research advancements and technological developments. This Seventh Edition has undergone an extensive revision process, including a comprehensive review of chapter outlines and two stages of critical review for each full chapter by the editorial team. In this edition, each author provides short video clips to give a taste of their chapter, along with instructor slides for teaching and training. New chapters cover changes in science and the needs of children around the world, global threats including COVID 19, wars, and natural disasters, care in low resource settings, diversity in relation to gender and sexual orientation, and body dysmorphic disorder, as well as digital technology detailing the growing interest in digital approaches to assessment and intervention. Written by a team of expert editors and contributors, Rutter's Child and Adolescent Psychiatry discusses sample topics including: Diagnosis, diagnostic formulations, and classifications of developmental psychopathology, as well as neurodevelopmental disorders and emotion, emotional regulation, and emotional disorders. Child maltreatment and sexual abuse, as well as influences on psychopathology including genetics, epigenetics, psychosocial adversity, parental psychiatric disorders, and physical treatment. Available treatments including parenting programs, cognitive behavioural therapy, family interventions, and relationship based treatments. Contexts of clinical encounters including refugee and asylum seeking children, children affected by HIV/AIDS, and children with specific sensory

impairments The Seventh Edition of Rutter's Child and Adolescent Psychiatry is an essential resource for all professionals working and learning in the fields of child and adolescent mental health and developmental psychopathology along with clinicians working in primary care and paediatric settings
