

HOW TO WRITE A RESEARCH PAPER TITLE

Why Does the Research Title Matter?

How to title a research paper is perhaps the most important question when writing an article for publication. The research title is the first thing that journal editors and reviewers see when they look at your paper and the only piece of information that fellow researchers will see in a database or search engine query. Good titles that are concise and contain all the relevant terms have been shown to increase citation counts and Altmetric scores.

Therefore, when you write the title of an article, you want to make sure it captures all of the relevant aspects of your study. But it also should present them in a way that is accessible and captivating to readers. Follow these steps to create the best research paper titles for your work.

How to Write a Research Paper Title in 5 Steps

You might wonder how you are supposed to pick a title from all the content that your manuscript contains—how are you supposed to choose? What will make your research paper title come up in search engines and what will make the people in your field read it?

In a nutshell, your research title should accurately capture what you have done, it should sound interesting to the people who work on the same or a similar topic, and it should contain the important keywords that other researchers use when looking for literature in databases. To make the title writing process as simple as possible, we have broken it down into 5 simple steps.
