Imagined Futures in Science, Technology and Society Gert Verschraegen, Frédéric Vandermoere, Luc Braeckmans, Barbara Segaert, 2017-04-07 Imagining forecasting and predicting the future is an inextricable and increasingly important part of the present States organizations and individuals almost continuously have to make decisions about future actions financial investments or technological innovation without much knowledge of what will exactly happen in the future Science and technology play a crucial role in this collective attempt to make sense of the future Technological developments such as nanotechnology robotics or solar energy largely shape how we dream and think about the future while economic forecasts gene tests or climate change projections help us to make images of what may possibly occur in the future This book provides one of the first interdisciplinary assessments of how scientific and technological imaginations matter in the formation of human ecological and societal futures Rooted in different disciplines such as sociology philosophy and science and technology studies it explores how various actors such as scientists companies or states imagine the future to be and act upon that imagination Bringing together case studies from different regions around the globe including the electrification of German car infrastructure or genetically modified crops in India Imagined Futures in Science Technology and Society shows how science and technology create novel forms of imagination thereby opening horizons toward alternative futures By developing central aspects of the current debate on how scientific imagination and future making interact this timely volume provides a fresh look at the complex interrelationships between science technology

and society This book will be of interest to postgraduate students interested in Science and Technology Studies History and Philosophy of Science Sociology Cultural Studies Anthropology Political Sciences Future Studies and Literary Sciences

Markets and Policy Measures in the Evolution of Electric Mobility Dirk Fornahl, Michael Hülsmann, 2015-11-06 This edited monograph collects theoretical empirical and political contributions from different fields focusing on the commercial launch of electric mobility and intending to shed more light on the complexity of supply and demand It is an ongoing discussion both in the public as well as in academia whether or not electric mobility is capable of gaining a considerable market share in the near future The target audience primarily comprises researchers and practitioners in the field but the book may also be beneficial for graduate students *Evolutionary Paths Towards the Mobility Patterns of the Future* Michael Hülsmann, Dirk Fornahl, 2013-09-26 This edited volume presents new insights and challenges in the field of electric mobility in relation to new mobility and infrastructure concepts as well as to renewable energies The book covers the socio economic view on the topic as well as technical aspects and thus offers valuable knowledge for future business models It primarily addresses practitioners and researchers in the field but may also be of use to graduate students Scientific American, 1893 **Forthcoming Books** Rose Arny, 1998-06 **Nursing Times**, 1980 Electric Vehicles In Shared Fleets: Mobility Management, Business Models, And Decision Support Systems Kenan Degirmenci, Thomas M Cerbe, Wolfgang E Pfau, 2022-04-28 The electrification of shared fleets offers numerous benefits including the reduction of local emissions of pollutants which leads to ecological improvements such as the improvement of air quality *Electric Vehicles in Shared Fleets* considers a holistic concept for a socio technical system with a focus on three core areas integrated mobility solutions business models for economic viability and information systems that support decision making for the successful implementation and operation of electric vehicles in shared fleets In this book we examine different aspects within these areas including multimodal mobility grid integration of electric vehicles shared autonomous electric vehicle services relocation strategies in shared fleets and the challenge of battery life of electric vehicles Insights into the future of transport are provided which is predicted to be shared autonomous and electric This will require the expansion of the charging infrastructure to provide adequate premises for the electrification of transportation and to create market demand **Technology and Culture**, 1984 **Current Index to Journals in Education**, 1984 An Electric Vehicle Conversion Start-Up. Development of a Business Model Approach Fabian Hoeft, 2019-10-24 Master s Thesis from the year 2019 in the subject Business economics Business Management Corporate Governance grade 1 3 Niederrhein University of Applied Sciences Krefeld School of Business and Economics language English abstract Today s world of mobility is characterised by a high degree of dynamism and change is becoming apparent Currently around 45 million passenger cars with conventional combustion engines powered by diesel or petrol are registered in Germany The share of electric vehicles is still well below one per cent Nevertheless the voices for sustainable and environmentally friendly transport are becoming louder One

political measure in this respect is the implementation of driving bans in major German cities for some conventional combustion cars Car electrification is a solution for converting cars with conventional combustion engines to electric drives In the context of this thesis car electrification is regarded as a transition solution towards a nationwide electrified transport network of new electric cars A comprehensive concept of a business model approach from a start up perspective has been developed based on the analysis of the environment industry and customer needs Analysing the structure of the electrical conversion industry revealed that the subject of car electrification is hardly widespread and that current suppliers have only converted a smaller number of cars Besides the small scale of implementation the operational execution by existing suppliers can be considered weak in terms of competitiveness and sustainability The analysis of the needs of potential customers of car electrification using qualitative and quantitative methods has led to incredibly valuable insights for the development of the business model approach A high openness to purchase was expressed considering some of the factors mentioned such as a test drive with an electrified car before purchase and a durability guarantee of the conversion The high relevance of initial acquisition costs compared to operating expenses in the purchase decision for passenger cars is another precious insight The business model approach developed based on the findings obtained differs fundamentally from the strategies of today's providers By incorporating the existing infrastructure of workshops and service points proximity to the end customer and scalability of the business operation can be achieved Partnering with universities and industry are two critical elements in the development of a sustainable secure and user friendly technical solution *Fortune* Henry Robinson Luce,1959

SRDS Consumer Magazine Advertising Source ,1998 **Indianapolis Monthly** ,2008 **Who's Driving Electric Cars** Marcello Contestabile,Gil Tal,Thomas Turrentine,2020-03-17 This book offers a comprehensive yet accessible snapshot of the latest consumer research on the adoption and use of electric vehicles It discusses the importance of developing a better understanding of consumer behavior in relation to electric vehicles and the advantages that can be gained from the growing number of electric vehicle users who can now be studied directly In turn it systematically analyzes the leading markets for electric vehicles in North America Europe and Asia Bringing together the experience and expertise of authoritative researchers and practicing professionals the book shares a wide range of empirical data obtained at the national level and summarizes the general lessons learned The last part of the book discusses policy relevant insights forecasts the future evolution of the field in terms of methods and data availability and addresses several key questions that policymakers and other stakeholders are currently facing *Geographical Abstracts* ,1987 Subject index to various sections of Geo abstracts **Books in Series** ,1979 **Electrifying Mobility** Graham Parkhurst,William Clayton,2022-10-17 Electrifying Mobility Realising a Sustainable Future for the Car considers the drivers barriers to adoption and the current lived experience of electric vehicles drawing upon this experience to inform planning for mass adoption and how regulation might change to reflect the specific needs and challenges raised *The Business of Sustainable Mobility* Paul

Nieuwenhuis, Philip Vergragt, Peter Wells, 2017-09-08 In many parts of the world there is a crisis of mobility This book shows that technology may well not be enough in itself and that for a genuinely sustainable transport future far more radical change affecting many aspects of society is needed It is useful for academics practitioners and policy makers
