The Boeing F/a-18E/F Super Hornet and EA-18G Growler Brad Elward,2012 The story of how the Super Hornet and Growler came into existence is the focus of this new book The F A 18E F has its roots in the late 1980s Hornet 2000 study which itself evaluated ways to enhance the range payload and bring back capability of the existing F A 18 Hornet Through a series of trade offs imposed by largely limited defense funds what emerged was a versatile affordable strike fighter aircraft that has served the Navy well since its fleet introduction in 2002 The Growler has a similar history Itself an offshoot of the Super Hornet program the EA 18G brought many of the Super Hornet s attributes speed maneuverability self defense capability and advanced systems into the electronic attack community and is now posed to assume all such missions from the venerable EA 6B Prowler within the next few years The book draws on interviews with many of the key players in the F A 18E F and EA 18G program and on many press reports of the day to tell the story of how these aircraft were designed developed and deployed Moreover the book provides insights into the problems faced by these key individuals as well as the management methods they used to produce aircraft that have consistently been delivered at or ahead of schedule under cost and under weight

F/A-18E/F Super Hornet and EA-18G Growler Ken Neubeck,2020 The Boeing F A 18 E F Super Hornet is an evolutionary redesign of the McDonnell Douglas F A 18 A B Hornet The Legacy F A 18 Hornet first flew in 1980 and met the requirement for a multirole fighter to complement the larger and more expensive Grumman F 14 Tomcat serving in fleet defense interceptor and air superiority roles The Hornet proved to be effective but it was limited in combat radius due to fuel capacity This would be corrected with the newer and larger F A 18 Super Hornet design which is now the primary fighter attack aircraft used in the US Navy carrier fleet and has replaced both the legacy Hornet and the F 14 Tomcat Additionally the Super Hornet airframe design was used for the design of the EA 18G Growler which took over the electronic countermeasures ECM role of the EA 6B Prowler

Withington,2020-01-31 An in depth look at the weaponry tactics and combat pilots involved in neutralizing enemy air defenses from the Vietnam War to today Detecting and destroying enemy Surface to Air Missiles SAMs and radar is arguably the most dangerous mission that any pilot can undertake Tactics differ with air forces but the general principal is to fly a formation of aircraft into an area where the enemy s air defenses are strong wait for their radar to illuminate the aircraft and then launch a volley of anti radiation missiles to destroy the radar and thus blind the SAMs and air defenses Put simply without the Suppression of Enemy Air Defenses SEAD mission the loss of other aircraft will be too high and the effectiveness of attack on the enemy too low Despite the undeniable bravery of the aircrews who flew these missions for the United States Air Force in every conflict since the Vietnam war and their colleagues in other air forces across the world who have risked their lives in similar missions the tactics history aircraft and weapons of the SEAD mission have seldom benefited from rigorous historical examination Using interviews with SEAD pilots industrial experts and historical documents this book for the first time will give a detailed history of the SEAD mission from the Vietnam War to the present day **United States Fighter Aircraft 1990-1999** Source Wikipedia,2013-09 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online Pages 25 Chapters Lockheed Martin F 22 Raptor Northrop YF 23 Boeing F A 18E F Super Hornet Boeing EA 18G Growler Lockheed YF 22 Excerpt The Lockheed Martin Boeing F 22 Raptor is a single seat twin engine fifth generation supermaneuverable fighter aircraft that uses stealth technology It was designed primarily as an air superiority fighter but has additional capabilities that include ground attack electronic warfare and signals intelligence roles Lockheed Martin Aeronautics is the prime contractor and is responsible for the majority of the airframe weapon systems and final assembly of the F 22 Program partner Boeing Defense Space Security provides the wings aft fuselage avionics integration and all of the pilot and maintenance training systems The aircraft was variously designated F 22 and F A 22 during the years prior to formally entering USAF service in December 2005 as the F 22A Despite a protracted and costly development period the United States Air Force considers the F 22 a critical component of US tactical air power and claims that the aircraft is unmatched by any known or projected fighter while Lockheed Martin claims that the Raptor s combination of stealth speed agility precision and situational awareness combined with air to air and air to ground combat capabilities makes it the best overall fighter in the world today Air Chief Marshal Angus Houston Chief of the Australian Defence Force said in 2004 that the F 22 will be the most outstanding fighter plane ever built The high cost of the aircraft a lack of clear air to air combat missions because of delays in the Russian and Chinese fifth generation fighter programs a US ban on Raptor exports and the ongoing development of the supposedly cheaper and more versatile F 35 resulted in calls to end F 22 production In April 2009 the US *Fighters of the 20th Century* Jim Winchester,2005-04-09 A guide to the most famous fighter aircraft of the 20th century It includes examples from around the world in chronological order so that the best of every period can be compared from triplanes to supersonic interceptors Specifications give
