Multilayer Flexible Packaging John R. Wagner Jr., 2009-11-03 A comprehensive and highly practical survey of the materials hardware processes and applications of flexible plastic films Aimed at a wide audience of engineers technicians managers purchasing agents and users Multilayer Flexible Packaging provides a thorough introduction to the manufacturing and applications of flexible plastic films covering Materials Hardware and Processes Multilayer film designs and applications The materials coverage includes detailed sections on polyethylene polypropylene and additives The dies used to produce multilayer films are explored in the hardware section and the process engineering of film manufacture explained with a particular focus on meeting specifications and targets The section includes unique coverage of the problematic area of bending technology providing a unique explanation of the issues involved in the blending of viscoelastic non Newtonian polymeric materials About the author John R Wagner Jr is President of Crescent Associates Inc a consulting firm that specializes in plastic films and flexible packaging He graduated from the University of Notre Dame with a BS and MS in Chemical Engineering

Trends in Packaging of Food, Beverages and Other Fast-Moving Consumer Goods (FMCG) Neil Farmer, 2013-02-26 Packaging plays an essential role in protecting and extending the shelf life of a wide range of foods beverages and other fast moving consumer goods There have been many key developments in packaging materials and technologies in recent years and Trends in packaging of food beverages and other fast moving consumer goods FMCG provides a concise review of these developments and international market trends Beginning with a concise introduction to the present status and trends in innovations in packaging for food beverages and other fast moving consumer goods the book

goes on to consider modified atmosphere packaging and other active packaging systems including smart and intelligent packaging and the role these play in augmenting and securing the consumer brand experience. Developments in plastic and bioplastic materials and recycling systems are then discussed followed by innovations and trends in metal paper and paperboard packaging. Further chapters review international environmental and sustainability regulatory and legislative frameworks before the use of nanotechnology smart and interactive packaging developments for enhanced communication at the packaging user interface are explored. Finally the book concludes by considering potential future trends in materials and technologies across the international packaging market. With its distinguished editor and international team of expert contributors, *Trends in packaging of food beverages and other fast moving consumer goods* FMCG is an important reference tool providing a practical overview of emerging packaging technologies and market trends for research and design professionals in the food and packaging industry and academics working in this area. Introduces the present status, current trends and new innovations in the field whilst considering future trends in materials and technologies. Considers modified atmosphere packaging and other active packaging systems including smart and intelligent packaging. Discusses developments in plastic and bioplastic materials and recycling systems.

Novel Strategies to Improve Shelf-Life and Quality of Foods Santosh K. Mishra, Megh R. Goyal, 2020-11-25. This volume focuses on food preservation prior to distribution and sale which is a major challenge in the tropical climates of most developing nations. In order to assure that food products are safe for human consumption due importance must be given to the quality and safety aspects of production, processing and distribution. This volume provides an informative overview of recent research on the therapeutic potential of various new and natural compounds along with novel technologies for enhanced shelf life, longevity and food safety. It also looks at the antimicrobial constituents of different sources and the history of their use as biopreservatives. It includes scientific evaluations of their use as alternative or potential biopreservatives. Focusing on real life applications in consumer and food products, the book is divided into three parts covering health and quality aspects of food preservation, applications of novel biomolecules for quality and safety of foods and novel research techniques in food biopreservation.
