

Security System User's Guide

Before using this manual, you should be familiar with the User's Cards located inside the keypad. The User's Cards provide instructions for frequently used functions.

This guide contains instructions for system owners to change other user's passwords. It also describes basic features of the security system.

Maintenance and Service

The keypad requires very little maintenance. However, test the system weekly to insure early detection of a need for service. A test schedule and maintenance program can be arranged with your alarm company. If you notice a change in operation during normal use or testing, call for service as soon as possible. Do not attempt to repair the control panel, keypad, or detectors yourself.

Call _____ Before Testing.

The security system is connected to this telephone number:

The security control panel is connected to the phone jack located:

Power Failure

If your keypad indicates a power failure, and you have power in the rest of your premises, there may be a problem with the electrical transformer or circuit breaker supplying power to your security control panel. First check to be sure that the transformer is securely plugged into the electrical outlet. If it appears to be damaged in any way, do not attempt to repair it. Call your security company for service.

Transformer location: _____

If the transformer is plugged in, check the circuit breaker supplying power to the outlet. If the breaker is tripped, check the appliances on the circuit for signs of electrical problems. Make sure someone has not intentionally turned the breaker off. When all is clear, reset the breaker.

Circuit Breaker number: _____
