facilitate learning and how to prepare students for their future careers are extensively covered and innovative solutions are  
proposed throughout This unique book brings together a breadth of expertise attested by the broad backgrounds of the  
experts and educational practitioners contributing to this volume to lay the foundations for the future direction with the  
improvement of education of engineers in mind This collaborative effort by a group of uniquely placed educational  
practitioners provides guidance on the status of current engineering education and lays the foundations for its future  
direction The reasons why we teach what we teach how we teach when we teach where we teach and who teaches are all re  
examined in a new light and ideas and solutions are proposed and evidentially supported The book sets out ideas for the need  
to develop a systemic and interdisciplinary approach to the education of future engineers on a model of student based  
learning This book will be of great interest to academics and educational researchers in the fields of engineering education  
and higher education It will also appeal to higher education policymakers educators and university teachers     Foundations
