This approach provides real-time information about the lands and crops that will help farmers make right decisions. agriculture systems based on the internet of things (IOT) technology is explained in detail. Author has concentrated on greenhouse. In this paper, a practical, low-cost and environmental friendly Intelligent Greenhouse Monitoring System (IGMS) is designed based on WSN technology. The main objective of this paper is to compare the efficiency of irrigation using two methodologies, Schedule and automated.

Chidambaramnathan C.M et.al[2] In this paper, Author have discussed the process to legitimately fine tune IEEE 802.15.4 details and the examining recurrence of conveyed sensor hubs. also introduced the challenges and issues in IEEE 802.15.4 mac protocol. Author have included limitations of wireless sensor network in agriculture like, Data security, Data maintenance, Size of the data and processing techniques, Handling Interruptions in data transfers.

G.Sahitya et.al[3] In this paper, Author have discussed about zigbee. It is an IEEE based standard for wireless communication. The difference between the ZigBee and 802.15.4, 802.15.4 has only Mac and physical layer but layer above that is present in the ZigBee which makes the communication very effective. Author shows the design implementation of ZigBee.

Author has conducted two different set of tests were conducted are Test conducted in closed room and Test conducted with an open environment

A reliable wireless sensor network is implemented. The output of the total setup designed can be observed in the computer to which the coordinator (receiver X Bee module) is connected.

Optimal Firm Behaviour in the Context of Technological Progress and a Business Cycle Onno van Hilten, 2013-03-14 This thesis is a theoretical study of the optimal dynamic policies of a to some extent slowly adjusting firm that faces an exogeneously given technological progress and an exogeneously given business cycle It belongs to the area of mathematical economics It is intended to appeal to mathematical economists in the first place economists in the second place and mathematicians in the third place It entails an attempt to stretch the limits of the application of deterministic dynamic optimisation to economics in particular to firm behaviour A well known Dutch economist and trained mathematician recently stated in 1 a local university newspaper that mathematical economists give economics a bad reputation since they formulate their problems from a mathematical point of view and they are only interested in technical mathematical problems At the same time however profound as economists may be when it comes to extending or modifying the existing theory to make it applicable to a certain

economic problem an understanding of optimal control theory which is the mathematical theory used in this thesis ovh based solely on heuristic arguments will often turn out to be inadequate SydS **Corrosion in Amine Treating Units** Johan van Roij,2021-10-27 Corrosion in Amine Treating Units Second Edition presents a fully updated resource with a broadened focus that includes corrosion in not only refining operations but also in oil and gas production New sections have been added on inhibition corrosion modeling and metallic coatings More detailed descriptions of the degradation mechanisms and Integrity Operating Windows IOW are now included as is more in depth information on guidelines for what sections and locations are most vulnerable to corrosion and how to control corrosion in amine units e g using corrosion Loop descriptions and providing indicative integrity operating windows for operation to achieve a suitable life expectance Provides new insights on the degradation mechanisms occurring in amine treating units and the locations within the unit where they occur Discusses how to mitigate and control corrosion in amine units Provides guidance for setting up corrosion control documents and inspection and maintenance plans for amine treating units Stress Distribution and Optimum Design of Polypropylene and Laminated Transtibial Prosthetic Sockets. FEM and Experimental Implementations Hayder Al-Shuka,2018-02-08 Scientific Study from the year 2017 in the subject Medicine Other language English abstract This study presents analyses for below knee prosthetic socket of a human Socket stress distribution is performed on three types of socket polypropylene 5mm polypropylene 3mm and a standard laminate 3mm sockets to determine the stresses path through the prosthetic socket during the gait cycle It is found that heel strike phase is the critical phase The stresses increase at the socket base while the maximum deflection is maximum at the patellar region of the socket This work is achieved by finite element program ANSYS The development of design specifications of a below the knee prosthetic socket is presented in this study for successful ambulation and comfort Seven different design models are created by changing the socket wall thickness and the material Polypropylene socket gives the best results with regard to the allowable deflection for the regions of the pressure relief areas of the stump The effect of varying the modulus of elasticity on the polypropylene socket is considered in this study Three models are analyzed with different tensile creep moduli during different periods It is found that the polypropylene socket will enlarge in size with time An experimental study is conducted to compare the strength of five prosthetic sockets made of different materials Compression three point flexural and tensile tests are implemented by the Testometric machine The laminate sockets have larger compressive stiffness than polypropylene while polypropylene has larger flexural stiffness than the tested laminates except for socket No 5 *Problems of Religion* Durant Drake,1916 *Bulletin Wisconsin Geological and Natural History Survey*,1907 *Fluidized Bed Combustion of Polyvinyl Chloride with Coal* Duane Bernard Paul,1979 Polymer Latices, Especially the Formation of Ordered Monolayers by Spin Coating Yihua Yue,1989 *Modeling Heat Transfer in Rooms Using Transfer Function Methods* James M. chapter a brief literature survey on measures of entropy and divergence measures is presented It also outlines the basic concepts of fuzzy sets A brief review on fuzzy information measures and fuzzy directed divergence are given here The concept of multiple criteria decision making problem is also presented In addition a general overview of coding theory is given and summarizes the objectives with an overview of the work reported in later chapters Chapter 2 In Chapter 2 after reviewing some literature on measures of information for fuzzy sets a new generalized fuzzy information measure involving two parameters of order and type has been introduced The necessary properties of the proposed measure have been verified Further the monotonic nature of generalized fuzzy information measure with respect to the parameters is studied and the validity of the same is verified by constructing the computed tables and plots on taking different values of the parameters Chapter 3 Divergence is an important measure in information theory as well as in fuzzy set theory which has widely used by researchers in many application areas Generalized divergence measures provide flexibility to the users and enhance their applicability range This chapter proposes a new generalized fuzzy divergence measure It may be remarked that the strength of a measure lies in its properties The new measure has important properties proved in this chapter to enhance the employability of this measure Special cases are also discussed for providing particular results Chapter 3 deals with the introduction of a new generalized measure of fuzzy directed divergence involving two real parameters The proposed measure satisfies all the necessary properties of being a measure Some additional properties of the proposed measure have also been studied Further the monotonic nature of generalized fuzzy directed divergence measure with respect to the parameters is studied and validity of the same is checked by constructing the computed tables and plots on taking different fuzzy sets and different values of the parameters Corresponding measures of total ambiguity and fuzzy information improvement have also been defined and studied
