Observing Human Traits Lab

Background: Physical traits are observable characteristics that are determined by genes. Genes are specific segments of DNA located on chromosomes that code for a particular trait. Most genes have two or more variations called alleles. Some alleles are dominant over others and dominant alleles will be expressed (an organism's phenotype or physical appearance) over recessive alleles. Recessive alleles may be present in an organism but expression is masked in the presence of a dominant allele for the same gene. Recessive traits are only expressed when there are two recessive alleles present in the genotype (DNA code).

Keep in mind that it's not always quite this simple. There are other factors that influence trait expression, and most traits have several genes that influence them. This is an introduction to dominant and recessive traits. Let's get started!

Directions: Circle the phenotype you have for each of the following traits.

Personal Traits		
Trait	Phenotype	Phenotype
Handedness	Right-handed	Left-handed
Earlobes	Attached	Unattached
Tongue rolling	Yes	No
Widow's peak	Yes	No
Chin	Pointed chin	Smooth chin
Hairline	Widow's peak	Straight hairline
Bent little finger	Yes	No
Mid-digital hair	Yes	No
Eye dominance	Right-eye dominant	Left-eye dominant
Double jointed fingers	Yes	No
Hitchhiker's thumb	Yes	No
Hand clasping	Right thumb on top	Left thumb on top
Arm folding	Right arm on top	Left arm on top
Long second toe	Yes	No

Chapter 11 Observing Human Traits Lab Worksheet Answers

L Manion

Chapter 11 Observing Human Traits Lab Worksheet Answers:

Population Biology of Vector-Borne Diseases John M. Drake, Michael Bonsall, Michael R. Strand, Michael Strand, 2021
Population Biology of Vector Borne Diseases is the first comprehensive survey of this rapidly developing field. The chapter topics provide an up to date presentation of classical concepts, reviews of emerging trends, synthesis of existing knowledge and a prospective agenda for future research. The contributions offer authoritative and international perspectives from leading thinkers in the field. The dynamics of vector borne diseases are far more intrinsically ecological compared with their directly transmitted equivalents. The environmental dependence of ectotherm vectors means that vector borne pathogens are acutely sensitive to changing environmental conditions. Although perennially important vector borne diseases such as malaria and dengue have deeply informed our understanding of vector borne diseases, recent emerging viruses such as West Nile virus, Chikungunya virus and Zika virus have generated new scientific questions and practical problems. The study of vector borne disease has been a particularly rich source of ecological questions while ecological theory has provided the conceptual tools for thinking about their evolution, transmission and spatial extent. Population Biology of Vector Borne Diseases is an advanced textbook suitable for graduate level students taking courses in vector biology, population ecology, evolutionary ecology, disease ecology, medical entomology, viral ecology, evolution and parasitology, as well as providing a key reference for researchers across these fields.

Psychology of Music Siu-Lan Tan, Peter Pfordresher, Rom Harré, 2025-12-22
From the physical vibrations of sound to the perplexing questions of how music conveys meaning, Psychology of Music: From Sound to Significance takes readers on a wide ranging exploration of this vibrant multidisciplinary field of study. Now in its third edition, the book emphasizes meaningful links between academic learning and real world contexts, pointing readers towards intriguing strands of research in both basic and applied areas that are highlighted throughout. In this new edition, the authors apply the same richness of depth and scope that were the hallmarks of the previous editions of this text, exploring the foundations of music psychology, the perception and cognition of music, development, learning and performance, and the meaning and significance of music. Key features include: More than 450 new citations to reflect advances in the field; New boxes exploring topics such as the musical experience of cochlear implant users, pitch and rhythm perception in animals, gene environment interplay and the benefits of music in medical and therapeutic contexts; An expanded appendix including many new tried and tested projects and exercises for instructors. This book continues to be invaluable to both psychology and music undergraduate and postgraduate students and instructors and will appeal to anyone interested in the vital and expanding field of psychology of music.
