

## Genetics Worksheet

### Part 1 Introduction:

- Describe the genotypes given (use your notes). The first two are already done.
  - DD homozygous, dominant
  - Dd heterozygous
  - dd \_\_\_\_\_
  - ss \_\_\_\_\_
  - Yy \_\_\_\_\_
  - WW \_\_\_\_\_
- In humans, brown eye color (B), is dominant over blue eye color (b). What are the **phenotypes** of the following genotypes? In other words, what color eyes will they have?
  - BB \_\_\_\_\_
  - bb \_\_\_\_\_
  - Bb \_\_\_\_\_

### The Five (5) Steps Associated With Solving a Genetics Problem:

*If you take the time to follow the directions below, you will be able to solve most genetics problems.*

- Determine** the **genotypes** of the parents or whatever is given in problem.
- Set up your **Punnett square** as follows: \*# sq. based on possible gametes that can be formed.

- Fill in** the squares. This represents the possible combinations that could occur during fertilization.
- Write out** the possible **genotypic ratio** of the offspring.
- Using the **genotypic ratio** determine the phenotypic ratio for the offspring.

### Part 2: Sample Problem (Just read this over, it is a practice problem)

*A heterozygous male, black eyed mouse is crossed with a red eyed, female mouse. Predict the possible offspring!*

- Step 1: Determine the genotype of the parents.** The male parent is **heterozygous** which means he has one allele for black eyes and one allele for red eyes. Since his eyes are black, this means that black allele must be dominant over the red allele. So the male parents genotype is "Bb" (B = allele for black eye, b = allele for red eye). The female parent has red eyes, there is only one way to have this recessive phenotype, so she must be homozygous recessive. Homozygous recessive means that her genotype must be "bb". Therefore, genotype of the parents is Bb x bb.

Essential Medical Genetics Edward S. Tobias, Michael Connor, Malcolm Ferguson-Smith, 2011-11-15 Adopted at Cambridge University Essential Medical Genetics provides students clinicians counsellors and scientists with the up to date information they need regarding the basic principles underlying medical genetics It also provides guidance on how to apply current knowledge in clinical contexts covering a wide variety of topics from genome structure and function to mutations screening and risk assessment for inherited disorders This sixth edition has

been substantially updated to include for instance the latest information on the Human Genome Project as well as several new molecular genetic and chromosome analysis techniques In full colour throughout it includes a number of brand new features including a large number of self assessment questions Essentials chapter summaries further reading suggestions and case study scenarios introducing clinical situations An invaluable new section gives illustrated practical advice regarding how to choose the best available online genetic databases and also importantly how to most easily and most efficiently use them for a wide range of purposes Essential Medical Genetics is the perfect resource for a course on medical genetics and is now accompanied by a regularly updated website and the FREE enhanced Wiley Desktop Edition upon purchase of the book The companion website at [www.wiley.com/go/tobias](http://www.wiley.com/go/tobias) features figures from the book in PowerPoint format and a link to the authors website with regularly updated links to genetic databases and additional self test questions This title is also available as a mobile App from MedHand Mobile Libraries Buy it now from iTunes Google Play or the MedHand Store

Basic Genetics Robert F. Weaver, Philip W. Hedrick, 1995 This text provides a balanced coverage of clinical and molecular genetics Experimental highlights and extensive use of learning aids are used throughout After a broad introduction to the topic the book is divided into 3 parts Part one explores Mendelian genetics including chromosomes and genetic linkage Part two looks at molecular genetics covering chemistry of a gene repluation and recombination of genes and transcription and its control in prokaryotes The final part introduces population genetics and discusses some of their extensions and applications
