(Chapter 3) (Motion in a straight line) (Exercises)

(Class 11)

Question 3.20:

Figure gives the $x-t$ plot of a particle executing one-dimensional simple harmonic motion. (You will learn about this motion in more detail in Chapter 14). Give the signs of position, velocity and acceleration variables of the particle at $t = 0.3 \text{ s}$, 1.2 s , -1.2 s .

Answer 3.20:

Negative, Negative, Positive (at $t = 0.3 \text{ s}$)

Positive, Positive, Negative (at $t = 1.2 \text{ s}$)

Negative, Positive, Positive (at $t = -1.2 \text{ s}$)

For simple harmonic motion (SHM) of a particle, acceleration (a) is given by the relation:

$$a = -\omega^2 x \quad \omega \rightarrow \text{angular frequency} \quad \dots (i)$$

$$t = 0.3 \text{ s}$$

In this time interval, x is negative. Thus, the slope of the $x-t$ plot will also be negative. Therefore, both position and velocity are negative.

However, using equation (i), acceleration of the particle will be positive.

$$t = 1.2 \text{ s}$$

In this time interval, x is positive. Thus, the slope of the $x-t$ plot will also be positive. Therefore, both position and velocity are positive.

However, using equation (i), acceleration of the particle comes to be negative.

$$t = -1.2 \text{ s}$$

In this time interval, x is negative. Thus, the slope of the $x-t$ plot will also be negative. Since both x and t are negative, the velocity comes to be positive. From equation (i), it can be inferred that the acceleration of the particle will be positive.

Question 3.21:

Figure gives the $x-t$ plot of a particle in one-dimensional motion. Three different equal intervals of time are shown. In which interval is the average speed greatest, and in which is it the least? Give the sign of average velocity for each interval.

Answer 3.21:

Interval 3 (Greatest), Interval 2 (Least)

Positive (Intervals 1 & 2), Negative (Interval 3)

The average speed of a particle shown in the $x-t$ graph is obtained from the slope of the graph in a particular interval of time.

It is clear from the graph that the slope is maximum and minimum respectively in intervals 3 and 2 respectively. Therefore, the average speed of the particle is the greatest in interval 3 and is the least in interval 2. The sign of average velocity is positive in both intervals 1 and 2 as the slope is positive in these intervals. However, it is negative in interval 3 because the slope is negative in this interval.
