- 10 Strong, robust, consistent and precise operation of the system is essential.
- 11 Conclusion: Speed-accuracy trade-off Control system design with feedback control systems cannot be avoided.
- 12 Below design specifications are not achieved using a control system without feedback control.
- 13 Therefore control systems are not designed with the best possible open loop system but with a feedback control.
- 14 Consequently the design of a control system is not the same as the design of a system.
