

# Observing Human Traits Lab

How much do you vary in your observations?

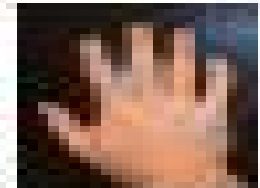

Traits are physical characteristics you inherit from your parents. In this investigation, you will observe and identify all your observable traits and compare yours to the characteristics table of your classmates. Record them, determine their frequency of occurrence among these' population.

## Observing your nose traits:

a. The genetic trait of a person's nose comes in different forms of observable traits. Each one takes from two different traits. Study the chart below that shows the possibilities carefully.

b. Working with a partner, observe each other's traits you have for characteristics of heredity. Circle your total of each characteristic. Write it in **TABLE**. For finger tip, record your frequency with handwriting of your own design. **your own finger tip**
