The Common Core Mathematics Companion: The Standards Decoded, Grades 3-5 Linda M. Gojak, Ruth Harbin Miles, 2015-05-28 Your user's guide to the mathematics standards. In the 12 short months since the ELA versions of The Common Core Companions Grades K-2 and 3-5 burst on the scene, they've already assisted tens of thousands of teachers with the day-to-day what you do. Teachers' one big criticism: what about mathematics? Luckily, NCTM past president Linda Gojak and mathematics coach Ruth Harbin Miles stepped up to the task. The result: That version of the mathematics standards you wish you had. Page by page, The Common Core Mathematics Companions clearly lay out the mathematics embedded in each standard for a deeper understanding of the content. Examples of what effective teaching and learning look like in the classroom. Connected standards within each domain so teachers can better appreciate how they relate. Priorities within clusters so teachers know where to focus their time. The three components of rigor: conceptual understanding, procedural skills and applications. Vocabulary and suggested materials for each grade level band with explicit connections to the standards. Common student misconceptions around key mathematical ideas with ways to address them. Don't spend another minute poring over the mathematics standards. Gojak and Miles have already done the heavy lifting for you. Focus instead on how to teach them using The Common Core Mathematics Companion as your one-stop guide for teaching, planning, assessing, collaborating, and designing powerful mathematics curriculum.

D. Rivera,2014-02-05 This is a methods book for elementary majors and preservice beginning elementary teachers It takes a very practical approach to learning to teach elementary school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the kindergarten through grade 5 portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The CCSSM content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all elementary students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It helps elementary majors and preservice beginning elementary teachers work within the realities of accountable pedagogy and develop a proactive disposition that is capable of supporting all elementary students in order for them to experience growth in mathematical understanding necessary for middle school and beyond including future careers **The Common Core State Standards in Mathematics for Place Value** Sarah N. Hughey,2020 This exploratory case study examines the developmental appropriateness of the Common Core State Standards in Mathematics CCSSM for place value for second through fourth grade students A correlation analysis was performed on end of year scores from the 2018 19 school year on a standardized norm referenced test and a conceptually based interview assessment from the Math Recovery program AVMR on 137 students from one school in the Midwest An item analysis was also performed on AVMR assessments for 70 students from the 2019 20 school year The results showed that second and third

grade students did not display the expected amount of growth in conceptual place value all students under utilized efficient mental computation strategies such as compensation and transformation and early overuse of the standard algorithms had a negative impact on place value understandings Recommendations related to these results include the addition of standards related to the compensation and transformation strategies the delay of certain standards in second and third grade and the removal of the standard algorithms for addition and subtraction from the elementary grades
