

STEP 10. INSTALL THE R1 INSULATION PANEL – To minimize air leaks and ensure optimal insulation, install the included R1 insulation panel. (14 in parts list) (See Figure below A-C).

First, measure the width from one side of the cabinet/sleeve (covering the side angles where the wingboard was just secured) to the end of the wingboard. (See Figure A)

Next, cut the R1 insulation panel to the measured width and remove protective cover, exposing adhesive on back panel (See Figure B)

Last, evenly apply the adhesive side of the panel across the entire height and width from side angle to wingboard panel. (See Figure C)

Repeat the steps above for the other wingboard panel.

STEP 11. INSTALL THE WINDOW SEALING GASKETS – Measure and cut the vinyl window seal gasket (grey color, Item 12) to fit the width of the window, and install as shown in Figure 29. Pull the window sash down behind the gasket. Measure and cut the dark foam window seal gasket (Item 13) and install it between the upper glass panel and the top part of the lower window sash (Figure 29).

⚠ CAUTION

Excessive Weight Hazard
Use two or more people when installing your air conditioner.
Failure to do so can result in back or other injury.

⚠ CAUTION

Cut/Sever
Although great care has been taken to minimize sharp edges in the construction of your unit, use gloves or other hand protection when handling unit.
Failure to do so can result in minor to moderate personal injury.

STEP 12 Carefully team lift the chassis and set it into the cabinet. Slide the chassis stopping approximately 3" from full insertion. Insert the chassis seal gasket (Item 14) one inch deep between the chassis and the cabinet (See Figure 29) as shown on page 28. A paint stir stick or ruler might be helpful here. Begin inserting the gasket at either bottom corner and go up the side, across the top, and down the opposite side. Then push the chassis all the way into the cabinet.

NOTE: If the chassis seal gasket is not installed or installed improperly, the operation of the unit will be negatively affected. Operational noise and outside noise will also be amplified.

STEP 13. Reattach the entry guard chassis entry guard retainer wire with the same screw retained in Step 1 (See Figure 14).
