On a separate piece of paper, answer the following:

Define the following vocabulary words:

- ecosystem
- limiting factor
- mutualism
- commensalism
- parasitism
- photosynthesis
- producer
- consumer
- omnivore
- carnivore
- biotic
- abiotic

1. Draw a simple energy pyramid showing 1) where **PRODUCERS**, **HERBIVORES** and **CARNIVORES** belong and 2) and what happens to energy as you go from the bottom to the top.

2. Using the picture above, tell what would happen if the **bird and rodent** populations were wiped out by a disease or sickness.

3. Using the picture above, given grass, insects and birds, tell how energy **TRANSFERS**.

4. A wetland ecosystem is like a swamp. These ecosystems sometimes seem un-important to people because they are not very pretty to the eye and they make-up land that is basically unusable to people, but they are very important parts of the environment and serve as a major habitat for many organisms. Would you agree that destroying these ugly, smelly places by dumping trash or filling them up with earth so we can build homes on them is O.K.? Or should we try to preserve the ones that still exist and replace the ones we have already destroyed?

Briefly explain your answer

5. What is the process called that producers use to **MAKE** their own food?

6. Give one simple example each of **PARASITISM**, **COMMENSALISM** and **MUTUALISM**.

Innovative Computational Intelligence: A Rough Guide to 134 Clever Algorithms Bo Xing, Wen-Jing Gao, 2013-12-13 The first notable feature of this book is its innovation Computational intelligence CI a fast evolving area is currently attracting lots of researchers attention in dealing with many complex problems At present there are quite a lot competing books existing in the market Nevertheless the present book is markedly different from the existing books in that it presents new paradigms of CI that have rarely mentioned before as opposed to the traditional CI techniques or methodologies employed in other books During the past decade a number of new CI algorithms are proposed Unfortunately they spread in a number of unrelated publishing directions which may hamper the use of such published resources These provide us with motivation to analyze the existing research for categorizing and synthesizing it in a meaningful manner The mission of this book is really important since those algorithms are going to be a new revolution in computer science We hope it will stimulate the readers to make novel contributions or even start a new paradigm based on nature phenomena Although structured as a textbook the book s straightforward self contained style will also appeal to a wide audience of professionals researchers and independent learners We believe that the book will be instrumental in initiating an integrated approach to complex problems by allowing cross fertilization of design principles from different design philosophies The second feature of this book is its comprehensiveness Through an extensive literature research there are 134 innovative CI algorithms covered in this book

Scientific and Technical Books and Serials in Print ,1984 *Home and School Reading and Study Guides* Donna M. Lusardi, Rosemarie Kent, 2007 **Collaborative Environmental Governance Frameworks** Timothy Gieseke, 2019-08-06 This book takes a practical approach to understanding and describing collaborative governance for resolving environmental problems It introduces a new collaborative governance assessment model and recognizes that collaborations are a natural result of organizations converging around complex issues Rather than identifying actors by their type of organization the actors are identified by the type of role they play This approach is aligned with how individuals and organizations interact in practice and their dependance on collaborations to solve emerging environmental problems The book discusses real cases with governance issues and creates new frameworks for collaborations Features Addresses communities at all levels and scales that are gravitating toward collaborations to solve their environmental issues Prepares and enables individuals to participate in collaborative governance and design collaborative governance frameworks Introduces the first simplified and standardized model to assess governance using governance actors and styles Explains governance in simple terms and builds governance frameworks from the individual s perspective the smallest viable unit of governance in a collaboration Describes tools of convergence for collaborative leaders to organize and align activities to create shared governance outcomes and outputs *American Neighborhoods and Residential Differentiation* Michael J. White, 1988-07-14 Residential patterns are reflections of social structure to ask who lives in which neighborhoods is to explore a sorting out process that is based largely

on socioeconomic status ethnicity and life cycle characteristics This benchmark volume uses census data with its uniquely detailed information on small geographic areas to bring into focus the familiar yet often vague concept of neighborhood Michael White examines nearly 6 000 census tracts approximating neighborhoods in twenty one representative metropolitan areas from Atlanta to Salt Lake City Newark to San Diego The availability of statistics spanning several decades and covering a wide range of demographic characteristics including age race occupation income and housing quality makes possible a rich analysis of the evolution and implications of differences among neighborhoods In this complex mosaic White finds patterns and traces them over time showing for example how racial segregation has declined modestly while socioeconomic segregation remains constant and how population diffusion gradually affects neighborhood composition His assessment of our urban settlement system also illuminates the social forces that shape contemporary city life and the troubling policy issues that plague it A Volume in the Russell Sage Foundation Census Series **Horse Feeding and Management** Markku Saastamoinen,2020-04-30 Horses perform variety of roles in our society serving people in several ways Proper nutrition and feeding management are some of the main objectives to ensure the well being and performance of horses Thus the link between equine health and good dietary treatment must be recognized to increase our understanding of the needs of the horse It is important to ensure science based knowledge is available to all stakeholders and people working in the horse industry This book presents research papers published in the Special Issue of Animals entitled Horse Nutrition and Management *Resources in Education* ,1998 **'American Book Publishing Record' Cumulative** R.
