In Defense of Openness Bas van der Vossen, Jason Brennan, 2018-08-01 The topic of global justice has long been a central concern within political philosophy and political theory and there is no doubt that it will remain significant given the persistence of poverty on a massive scale and soaring global inequality Yet virtually every analysis in the vast literature of the subject seems ignorant of what developmental economists both left and right have to say about the issue In Defense of Openness illuminates the problem by stressing that there is overwhelming evidence that economic rights and freedom are necessary for development and that global redistribution tends to hurt more than it helps Bas van der Vossen and Jason Brennan instead ask what a theory of global justice would look like if it were informed by the facts that mainstream development and institutional economics have brought to light They conceptualize global justice as global freedom and insist we can help the poor and help ourselves at the same time by implementing open borders free trade the strong protection of individual freedom and economic rights and property for all around the world In short they work from empirical consequentialist grounds to advocate for the market society as a model for global justice A spirited challenge to mainstream political theory from two leading political philosophers In Defense of Openness offers a new approach to global justice We don't need to save the poor The poor will save themselves if we would only get out of their way and let them

Democratic Governance and Economic Performance Dino Falaschetti, 2009-06-02 Conventional wisdom warns that unaccountable political and business agents can enrich a few at the expense of many But logically extending this wisdom implies that associated principals voters consumers shareholders will favor themselves over the greater good when rules of the game instead create too much accountability Democratic Governance and Economic Performance rigorously develops this hypothesis and finds statistical evidence and case study illustrations that democratic institutions at various governance levels e.g. federal state corporation have facilitated opportunistic gains for electoral consumer and shareholder principals To be sure this conclusion does not dismiss the potential for democratic governance to productively reduce agency costs Rather it suggests that policy makers lawyers and managers can improve governance by weighing the agency benefits of increased accountability against the distributional costs of favoring principal stakeholders over more general economic opportunities Carefully considering the fundamentals that give rise to this tradeoff should interest students and scholars working at the intersection of social science and the law and can help professionals improve their own performance in policy legal and business settings

Business, Entrepreneurship and Innovation Toward Poverty Reduction Steven Si, David Ahlstrom, Wei Jiang, John Cullen, 2021-07-26 Ways in which poverty can be reduced in both countries and regions through business entrepreneurship and government has been a hot issue for researchers and policymakers in recent years Governments can play an important role in helping the poor people by non profit organizations and others that help to seed business among the poor Businesses increasingly also see the large number of people in severe poverty not only as an issue

for social concern but also as a potentially large untapped market of consumers for goods and services Some scholars have called for poverty reduction through entrepreneurship owing to the fact that it can be an efficient path to also change the poor s attitudes and behaviours from a passive mode to a more active mode towards poverty reduction economically and socially In addition the sharing economy brings opportunities where everyone is a micro entrepreneur There is a recognition that these types of entrepreneurship above could offer the greatest single potential means to move individuals out of poverty in the nations and regions in the next 5 10 years This book provides new and valuable analyses of poverty and business entrepreneurship and innovation in current nations and regions including developing and developed countries As business entrepreneurship and innovation can help to generate greater business activity in settings of severe poverty they will help to solve poverty as individuals in severe poverty are able to both generate greater incomes and accumulate greater assets as they participate with large firms in those activities The chapters in this book were originally published as a special issue of the Entrepreneurship Regional Development Books in Print Supplement ,2002 Forthcoming Books Rose Arny,2001-06 *Business Books and Serials in Print* ,1977 **Book Review Index** ,2002 *Science Books & Films* ,1980 Paperbound Books in Print ,1992 **Books in Print** ,1994 **Subject Guide to Books in Print** ,2001 **Consultants & Consulting Organizations Directory** Cengage Gale,2009-05-12 *The Publishers' Trade List Annual* ,1979 *Bowker's Law Books and Serials in Print* ,1984 *Consultants & Consulting Organizations Directory: Descriptive listings and indexes* ,2009 The British National Bibliography Arthur James Wells,1971 **Religion Index Two** ,1992 **Annuaire Des Organisations Internationales** ,1967 Edition for 1983 84 published in 3 vols vol 1 Organization descriptions and index vol 2 International organization participation vol 3 Global action networks edition for 2012 2013 published in 5 vols vol 4 International organization bibliography and resources vol 4 Statistics visualizations patterns Die Stunde der Nashörner. Wie Unternehmen die neuen geopolitischen Risiken managen. Ansgar Baums,Thomas Ramge,2025-09-09 Graue Nashörner sind Risiken die Unternehmen kennen oder zumindest kennen sollten Sie tauchen nicht plötzlich auf wie schwarze Schwäne sondern sind vorhersehbar Und doch handeln viele Unternehmen nicht Gerade auf geopolitischer Ebene schlägt für die europäischen Unternehmen nun die Stunde der Nashörner Die Vereinigten Staaten und China kämpfen um die globale Vorherrschaft mit Zöllen und Exportkontrollen künstlicher Verknappung von Rohstoffen oder technischen Standards Trumps und Xis Nashörner sind brandgefährlich und wenn sich Unternehmen nicht wappnen drohen sie in diesem Kräftespiel zermalmt zu werden Der Geopolitikexperte Ansgar Baums und der Spiegel Bestsellerautor und Technikexperte Thomas Ramge fordern deshalb intelligentes geopolitisches Risikomanagement in einer umkämpften ungeordneten Welt Und sie zeigen wie das geht Kompetent und praxisnah beschreiben sie in ihrem Buch die neue Kampfzone in der sich Europas Unternehmen bewähren müssen Drei Fragen stehen im Fokus Was sind die Mechanismen dieses digitalen Kalten Krieges Welche Risiken ergeben sich aus der neuen geopolitischen Machtordnung für Unternehmen
