

Chapter 2 Section 1

Different economics systems have evolved in response to the problem of scarcity.

Economics system

The method used by society to produce and distribute goods and services.

THREE ECONOMIC QUESTIONS

WHAT goods and services SHOULD be produced?
HOW should these goods and services be produced?
WHO consumes these goods and services?

What goods and services should be produced?

Each society must decide what they should produce in order to satisfy their needs and wants.

How should these goods and services be produced?

How do we use our resources to produce our goods and services? For example should teachers have 20 students or 50 students in their classrooms?

Who consumes these goods and services?

Societies must decide how to distribute the goods and services they generate. The distribution of these goods and services is determined by how society distributes INCOME.

Factor Payments

Income people receive for supplying factors of production.

Each society answers the question of distribution based on its unique combination of social values and goals.
