

Economics Research Paper Proposal

Assignment: You need to decide on a topic to research for your term paper. The topic can cover anything that you want as long as you can explain why it is relevant to economics.

- Think about the following when brainstorming your topic:
 1. Previous knowledge
 2. Course content
 3. Personal or professional experiences/interests
- Use one of the following brainstorming strategies to come up with your research topic: list, map, or freewrite on a separate sheet of paper.
- Now, go online and survey sources.
 1. Read abstracts, headings and subheadings.
 2. Make note of charts, statistics and graphs.
 3. Read the reference lists.
 4. Read introductory and summary paragraphs.
 5. Skim body.
- Find 3 reliable sources and cite them in MLA style. Under each source, you must briefly explain why the source is reliable, and how you can use it in your paper.
- This should help you to FOCUS your topic.
 - Examples:
 - Topic: Technology and consumerism
 - Focused topic: the way television impacted consumerism within the nuclear family from the mid-50s to the early 60s.
 - Topic: Environmental issue connected to global warming
 - Focused topic: coal fires

Your brainstorming method, 3 sources, and focused topic will be due on Friday, April 6. On that day, you will be getting the rest of the requirements for your paper, including a schedule of the research process. This assignment is worth 50 points and will be a part of your final paper grade. Students who do not turn this assignment on time will receive a phone call home and will need to attend GSH the week of April 8.

Economics Exemplar Paper 2014 Grade1:

Kalecki and Kaleckian Economics Louis-Philippe Rochon, Marcin Czachor, Gracjan Robert Bachurewicz, 2021-11-29
This book helps in pushing forward a Kaleckian research agenda that is even more urgent given the 2007 2009 financial crisis and the current post COVID recovery Micha Kalecki was a leading heterodox economist whose influence in the field perhaps even surpasses that of Keynes Kalecki s insights are even more relevant today and scholars are encouraged to apply his conclusions to ensure the sustainability of our economic systems This edited volume honouring the work of Micha Kalecki includes chapters contributed by celebrated Kaleckian economists In honour of the 50th anniversary of his demise the Review of Political Economy ROPE and Edward Lipi ski Foundation hosted a conference in September 2020 to celebrate his contribution to heterodox economics and his lasting legacy These chapters honouring the work of Micha Kalecki span a panoply of topics and include a personal note from one of his former students and friend and cover topics such as Kalecki s relationship with the Cantabrigians labour economics fiscal policy income distribution gender finance debt and democracy The chapters in this book were originally published as a special issue of the journal Review of Political Economy *Oswaal ICSE Question Bank SOLVED PAPERS | Class 10 | Economic Application | For Exam 2024-25* Oswaal Editorial Board, 2024-04-01 Description of the Product 100% Updated with Latest Syllabus Questions Typologies We have got you covered with the latest and 100% updated curriculum Crisp Revision with Topic wise Revision Notes Smart Mind Maps Study smart not hard Extensive Practice with 700 Questions Self Assessment Papers To give you 700 chances to become a champ Concept Clarity with 500 Concepts Concept Videos For you to learn the cool way with videos and mind blowing concepts 100% Exam Readiness with Expert Answering Tips Suggestions for Students For you to be on the cutting edge of the coolest educational trends *Human-Centred Economics* Richard Samans, 2023-12-02 This open access book examines the chronic underperformance of economies with respect to inclusion sustainability and resilience It finds that the standard liberal economic growth and development model has evolved over the past century in a fundamentally unbalanced manner that underemphasizes the crucial role of institutions legal norms policy incentives and public administrative capacities in translating market based growth in the production of goods and services into broad and sustainable gains in social welfare at the household level Correcting this imbalance of emphasis in economic theory and policy between markets and institutions production and distribution and national income and household living standards is the single most important step required to transcend 20th century trickle down neoliberalism and replace it with a more human centred model of economic progress in the 21st century The book breaks new ground by integrating the principal institutional dimensions of the social contract into the heart of macroeconomic theory and presenting extensive corresponding reforms of domestic and international economic policy to refocus them on the median living standards rather than primarily aggregate wealth or GDP of nations This is the bottom line measure of national economic performance and it depends on the strength of both markets of exchange and

institutions in such areas as labour and social protection financial and corporate governance competition and rents anti corruption infrastructure and basic necessities environmental protection education and skilling etc Extensive comparative data are presented demonstrating that countries at every level of economic development have ample policy space to narrow their welfare gaps their underperformance on these and other key aspects of household living standards relative to the frontier of leading policy practice in peer countries

Inequality, Class, and Economics Eric Schutz, 2022-01-24 What if neoclassical economics addressed the question of class This accessible overview of economic theory launches this investigation The COVID 19 pandemic exposed the economic inequalities pervading every aspect of society and then multiplied them to a staggering degree A mere nine months into the lockdown the net worth of the infamous Forbes 400 increased by one trillion dollars In a single year the US poverty rate rose by the largest amount ever since record keeping began sixty years ago At the same time mass unemployment imperiled or erased the fragile right to quality health care for a substantial number of people living in states without Medicaid In *Inequality Class and Economics* Eric Schutz illumines the pillars undergirding the monstrous polarities which define our times and reveals them as the very same structures of power at the foundations of the class system under today's capitalism Employing both traditional and novel approaches to public policy *Inequality Class and Economics* offers prescriptions that can genuinely address the steepening and hardening of class boundaries This book pushes past economists' studied avoidance of the problem of class as a system of inequality based in unequal opportunity and exhorts us to tackle the heart of the problem at long last

The Economic Roots of the Umbrella Movement in Hong Kong Louis Augustin-Jean, Anthea Cheung, 2018-02-15 In the autumn of 2014 thousands of people young and educated in their majority occupied the chief business district and seat of the government in Hong Kong The protest known as the Umbrella Movement called for genuine democracy as well as a fairer social and economic system The book aims to provide a dynamic framework to explain why socioeconomic forces converged to produce such a situation Examining increasing inequality rising prices and stagnating incomes it stresses the role of economic and social factors as opposed to the domestic political and constitutional issues often assumed to be the root cause behind the protests It first argues that globalization and the increasing influence of China's economy in Hong Kong has weighted on salaries Second it shows that the oligopolistic nature of the local economy has generated rents which have reinforced inequality The book demonstrates that the younger generation which is still finding its place in society has been particularly affected by these phenomena especially with social mobility at a low point Offering a new approach to studying the Umbrella Movement this book will appeal to students and scholars interested in Hong Kong's political landscape as well Chinese politics more broadly

Journal of Economic Literature, 2014 *Public Banks and Public Purpose* Diana V. Barrowclough, Thomas Marois, 2026-01-22 This book examines the resurgence of public banks and their critical role in addressing global climate and development related challenges Drawing from the lessons of the 2008-09 financial crisis the implementation of the UN

Sustainable Development Goals and most crucially the COVID 19 pandemic it provides a comprehensive analysis of how public banking institutions can effectively scale up and deliver climate aligned development finance at affordable rates and favourable terms Through diverse case studies spanning national and multilateral public banks across both wealthy and developing regions the volume employs multidisciplinary approaches and mixed methodologies to evaluate their capacity mandate fulfilment and accountability mechanisms The research illuminates the complex power dynamics that determine who benefits from public banking initiatives and offers evidence based insights for strengthening these institutions ability to serve the public interest in the face of climate challenges This volume will appeal to a diverse readership including policymakers and government officials involved in development financial regulation and climate policy academics and researchers in economics finance political economy business and sustainable development professionals working in public private and development banks climate activists and NGOs focused on sustainable finance and graduate students studying public finance development economics sustainability and climate policy The book provides valuable insights for anyone interested in understanding how public financial institutions can be leveraged to address the pressing challenges of climate change while promoting equitable development outcomes **The Quarterly Review of Economics and Finance** ,2015

The Public Wealth of Cities Dag Detter,Stefan Folster,2017-07-18 How to leverage existing resources to meet the current and future needs of cities Crumbling streets and bridges Poorly performing schools and inadequate social services These are common complaints in cities which too often struggle just to keep the lights on much less make the long term investments necessary for future generations It doesn t have to be this way This book by two internationally recognized experts in public finance describes a new way of restoring economic vitality and financial stability to cities using steps that already have been proven remarkably successful The key is unlocking social human and economic wealth that cities already own but is out of sight or hidden A focus on existing public wealth helps to shift attention and resources from short term spending to longer term investments that can vastly raise the quality of life for many generations of urban residents A crucial first step is to understand a city s balance sheet too few cities comprehend how valuable a working tool this can be With this in hand taxpayers politicians and investors can better recognize the long term consequences of political decisions and make choices that mobilize real returns rather than rely on more taxes debt or austerity Another hidden asset is real estate Even poor cities own large swathes of poorly utilized land or they control underperforming utilities and other commercial assets Most cities could more than double their investments with smarter use of these commercial assets Managing the city s assets smartly through the authors proposed Urban Wealth Funds at arm s length from short term political influence will enable cities to ramp up much needed infrastructure investments The effect of Black Economic Empowerment (BEE) on racial inequality in South Africa Korbinian Stinglhamer,2017-10-11 Seminar paper from the year 2016 in the subject Economics Case Scenarios grade 1 0 University of Wisconsin Madison Economics course Economics 477 Economic Development of

Africa language English abstract This paper investigates the Black Economic Empowerment BEE program in South Africa and its economic justification by analyzing the trends in both intra and interracial inequality since the implementation of BEE. Even though inequality is driven by many different factors this paper attempts to analyze whether BEE was able to effectively reduce inequality in the way that it was intended. My findings suggest that BEE might have helped to reduce inequality between different races but that it increased inequality among black people. During Apartheid black people were excluded from major parts of South Africa's economy. This resulted in an unequal income distribution in South Africa. Even after Apartheid ended in 1994 income was distributed unequally between races. In order to reduce this inequality and equalize opportunities between the different races in South Africa the government implemented an affirmative action program called Black Economic Empowerment BEE in 2003. In this case and in the following sections the word black defines a racial group including Africans coloreds and Indians and can thus be used as synonym for non whites. BEE introduced a scorecard which rates companies based on their economic inclusion of black people. If the respective company receives a low rating on the scorecard there will likely be a negative effect on their profit compared to a company with a high rating. The basic critique of BEE is that its main beneficiary is a small elite. Studies about the actual effects of BEE are rare as data on this topic is limited.
