Micro-Economics C. Abraham, A. Thomas, 1972-12-31 The origin of this work is to be found in the cyclostyled course on The optimal allocation of resources in the firm and in the Nation taught by Mr Boiteux at the Centre d Etudes des Programmes Economiques C E P E Paris from 1957 to 1960 Of course several successive later rewritings and a great many additions have profoundly altered the initial version starting from a remarkably clear and concise exposition of economic theory we have ended with a book that is several hundred pages long It is not at all certain that Mr Boiteux would recognise this intellectual sponsorship Nor is it certain that the gain in information justifies such an increase in size However that may be the initial plan has survived Without Mr Boiteux this book would never have been undertaken it is a pleasant duty for us respectfully to acknowledge our debt to him here Microeconomic analysis that is to say that analysis which results from the study of the behaviour and activities of individual decision units was for a long time the main concern of the neo classicists Quite recently the introduction of macroeconomic theory dealing with aggregate quantities seemed to relegate it to second place But this is not where it belongs we tend to agree with Mr Raymond Barre that there are two different scales of analysis that complement rather than contrast with one another
