Three Dimensional Dynamic Analysis of Structures Edward L. Wilson,1997 The purpose of this publication is to summarize the computational methods that are used in many modern computer programs for the seismic analysis of three dimensional structural systems After more than thirty years of working closely with structural engineers it has become apparent that a need exists for a book on the Three Dimensional Dynamic Analysis of Structures The necessary computational background to conduct seismic computer analyses of large structures needs to be simplified and understood In addition problems associated with the creation of complex three dimensional computer models and the interpretation of results is emphasized in this book Manual of Seismic Design James L. Stratta,1987 Proceedings of the 6th International Conference on Smart Monitoring, Assessment and Rehabilitation of Civil Structures Xiang-Lin Gu,Masoud Motavalli,Alper Ilki,Qian-Qian Yu,2024-01-20 This book is a compilation of selected papers from the 6th International Conference on Smart Monitoring Assessment and Rehabilitation of Civil Structures SMAR 2022 The work focuses on the state of the practice and recent advances in testing and monitoring technology in structural modeling and assessment methods and in the application of advanced materials for structural rehabilitation The contents make valuable contributions to international professors research scientists professional engineers postdoctoral fellows and postgraduate students
