Ngwainmbi, 2014-05-08 Healthcare Management Strategy Communication and Development Challenges and Solutions in Developing Countries analyzes the ways in which health services public health administration and healthcare policies are managed in developing countries and how

intercultural intergroup and mass communication practices are weakening those efforts. If developing countries are to reach their development goals, their leaders must have a firm understanding of the impact of infectious diseases on their people and take prompt action to fix socioeconomic issues arising from the problems associated with poor health practices. Drawing on experiences from international health organizations such as the United Nations Population Fund (UNFPA), commissioned in poor countries to assist national governments in improving the wellbeing of their citizens, this volume analyzes maternal and child mortality and the spread of infectious diseases and offers communication strategies for the management of malaria, HIV, Aids, Polio, tuberculosis, and others in Somalia, Madagascar, Ghana, South Africa, Zimbabwe, Nigeria, the Democratic Republic of Congo, and India.

Explores the nexus between Nature-based Solutions (NbS) and global SDG, thus leading future research and practice worldwide. Presents novel conceptualizations, pathways, applications, evidence-based cases, and experiential assessments. Offers best practice portfolios for practitioners, city managers, policy makers, civil servants, environmental engineers to guide the practices of NbS towards SDG.

*Civic Education* Richard G. Niemi, Jane Junn, 2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching

Rubin, James M. Giarelli, 2013-10-11 This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social

studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the curriculum Civic Education for Diverse Citizens in Global Times directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory     *Foundations of Democracy* Center for Civic Education, Calabasas, CA.,1993 Introduces students to the four ideas which are basic to our constitutional form of government authority privacy responsibility and justice     National Standards for Civics and Government Center for Civic Education (Calabasas, Calif.),1994     *Making Civics Count* David E. Campbell,Meira Levinson,Frederick M. Hess,2012-10-01 By nearly every measure Americans are less engaged in their communities and political activity than generations past So write the editors of this volume who survey the current practices and history of citizenship education in the United States They argue that the current period of creative destruction when schools are closing and opening in response to reform mandates is an ideal time to take an in depth look at how successful strategies and programs promote civic education and good citizenship Making Civics Count offers research based insights into what diverse students and teachers know and do as civic actors and proposes a blueprint for civic education for a new generation that is both practical and visionary     *The Future of Civic Education* Elizabeth Yeager Washington,Keith C. Barton,2024-10-01 Speaking to the need to move beyond traditional formulations this textbook presents radical visions for transforming civic education in the United States Drawing on the experience of educators and scholars including those rooted in feminist queer abolitionist global and race conscious perspectives this work offers new practical ideas for civic education reform Responding to recent political crises many scholars educators and public commentators have called for a rebirth of civic education but these all are grounded in the premise that the goal of civic education should be to teach students about the U S Constitutional system and how to operate within it This book argues that the U S governmental system including the Constitution is infused with racist and anti democratic premises and procedures It asks How can we seek a new path one that is more democratic more equitable and more humane A diverse range of leading civic educators who are willing not just to push the boundaries of civic education but to operate outside its assumptions altogether explore what future possibilities for civic education might look like and how these innovative ideas could be implemented in the classroom Combining theory with practice *The Future of Civic Education* will be important reading for those studying or researching in social studies methods social studies issues citizenship and civic education It will also be beneficial to social studies teachers at elementary and secondary levels as well as policymakers and non governmental organizations NGOs     **We the people-- project citizen** Center for Civic Education (Calif.),National Conference of State Legislatures,1997
