## Clio User Guide:

**Textbank Systems** Erhard Mergenthaler, 2013-06-29 Psychoanalysis and information science are two disciplines that twenty years ago hardly anyone would have considered closely related with regard either to persons or subject matter. The cooperation between the two fields was made possible on the one hand by the development of information science from a technological discipline to a theoretically founded scientific discipline and on the other by the development of psychoanalysis from a hermetically closed special discipline to an open and empirical science. This study reports the successful inclusion of information science as an instrument of research on the psychoanalytic process. This direction of work was initiated by Donald Spence and Hartvig Dahl from the Research Institute of Mental Health New York at the end of the 1960s. H. Thom H. K. chele and their research group in Ulm must be credited with having adopted Spence's programs as early as 1974. At that time the programs even had to be implemented far away on the IBM computer at the University of Heidelberg. The efforts to expand computer-aided content analysis to a method for process research led in 1975 to the acquisition of the Hamburg program for Electronic Verbal Analysis EVA. In the following years the author of this study revised, extended, and supplemented the EVA to create the U1m version. This book now describes another step in the integration of information technology in fundamental research in psychoanalysis.

*Reference and Information Services* Kay Ann Cassell, Uma Hiremath, 2023-01-17 From the ongoing flood of misinformation to the swift changes occasioned by the pandemic, a myriad of factors is spurring our profession to rethink reference services. Luckily, this classic text is back in a newly overhauled edition that thoughtfully addresses the evolving reference landscape. Designed to complement every introductory library reference course, Cassell and Hiremath's book also serves as the perfect resource to guide current practitioners in their day-to-day work. It teaches failsafe methods for identifying important materials by matching specific types of questions to the best available sources regardless of format. Guided by a national advisory board of educators and experts, this thoroughly updated text presents chapters covering fundamental concepts, major reference sources, and special topics while also offering fresh insights on timely issues including a basic template for the skills required and expectations demanded of the reference librarian, the pandemic's effect on reference services, and how the ingenuity employed by libraries in providing remote and virtual reference is here to stay. A new chapter dedicated to health information with a special focus on health equity and information sources, selecting and evaluating reference materials with strategies for keeping up to date, a heightened emphasis on techniques for evaluating sources for misinformation, and ways to give library users the tools to discern facts vs. fake facts, reference as programming, readers' advisory services, developmentally appropriate material for children and young adults, and information literacy evidence-based guidance on handling microaggressions in reference interactions featuring discussions of cultural humility and competence alongside recommended resources on implicit bias, managing, assessing, and improving reference services, and the future of information and reference services encapsulating existing models, materials,

and services to project possible evolutions in the dynamic world of reference
