Political Knowledge in the Czech Republic Pat Lyons, 2017-06-01
The book examines the origins nature and impact of different facets of political knowledge in the Czech Republic between
1967 and 2014 The central argument presented in this book is that evaluating citizens on the basis of objective or factual
knowledge alone makes little sense What citizens know about politics comes from a variety of sources that are
complementary This is the first detailed study of how much Czechs know about politics and why it matters Here are some of
the key findings of this book There are many forms of political knowledge Citizens make decisions using different forms of
political knowledge Czechs knowledge of politics has remained constant over time How people answer knowledge questions
in surveys matters Political knowledge is shaped by personality traits Factual knowledge is linked with forecasting social
change but is not always linked with making correct voting Experts with high levels of knowledge do not agree on what is a
correct answer

Teaching Evaluation Handbook, 1993 Evaluating Interpersonal Skills in the Job Interview James B. Weitzul, 1992-03-23 Successful interviewing defined as selecting the appropriate person for a specific position is comparatively easy for some structured positions such as typist or mechanic Valid instruments to measure the key aptitudes to perform successfully in these positions are readily available and are commonly used Even candidates for some technical positions such as engineers or accountants can be evaluated for critical traits like intelligence and subject However positions requiring a defined set of interpersonal skills such as sales or middle executive level and general management are much more difficult to successfully recruit Evaluating Interpersonal Skills in the Job Interview provides that much needed assistance to the interviewer In this research based book Weitzul utilizes the results of thousands of interviews to devise a system to validly measure a candidate's interpersonal skills and thereby evaluate a candidate's suitability for a given position Initially a series of interpersonal traits are listed and defined which provide a basis for perceiving and analyzing people in an interview The interviewer is taught to read the whole person and interpret the candidate's behavior in terms of a set of interpersonal skills The material includes sample responses to a series of application and interviewing questions In this way a given candidate's responses can be compared directly to the responses of other individuals with known interpersonal skills The book also discusses methods to facilitate the interview process maintain the

conversational flow and politely enable the candidates to reveal themselves Evaluating Interpersonal Skills in the Job Interview can be effectively utilized by anyone who interviews for line staff and sales positions **California.
