Summer Math Learning Packet

Student's Entering Grade 4

These summer math activities will challenge your child to review math concepts and reinforce skills learned this year. Just a few minutes each-day spent "thinking and talking about math" will help reinforce all the math that has been learned and begin to bridge the foundation for extending to concepts that will be developed next year. The goal is for your child to have fun thinking and working with numbers to communicate mathematical ideas. While your child is working, ask whether how the solution was found and which particular strategy was efficient.

The math practices in this summer packet address core critical areas in grade 3:

1. developing understanding of multiplication and division and strategies for multiplication and division within 100
2. developing understanding of fractions, especially unit fractions (fractions with numerator 1)
3. developing understanding of the structure of rectangular arrays and of area
4. describing and analyzing two-dimensional shapes.

This packet consists of 2 calendar pages, one for June and one for July. There are problems included for each day of the week, excluding weekends. Challenges, ADPs and worksheets are also recommended to explore mathematics in different ways. We encourage your child to complete at least 15 math-days each month. We hope your child will spend at least 10 minutes a day, 4 to 5 times a week practicing math. Create a goal with your child to help further stay strong in math over the summer. For example, my child will aim to complete at least 200 minutes of math practice over the course of the summer and keep track of higher learning in a math journal. A math journal records your work either in print or digital format. See the example of a "great" journal entry.

If the activities suggested do not seem to "fit your child" as you have your own collection of math/math practices you would like to do, please feel free to substitute your own activities that better suit your child's needs or learning style. Examples: graphical multiplication facts using flashcards, count money, etc.

Student mathematics: keep your mathematics skills sharp and have a safe and enjoyable summer! ☺
