Buying, assembling, and teaching myself to use a Tormach Steve Dunthorne,2023-04-28

The author is a somewhat frustrated weekend engineer with a small lathe and an old manual milling machine in his garage whose day job doesn't reflect his passion for making mechanical things A chance discussion with a colleague culminated in him ordering a brand new CNC Computerised Numerical Control mill from the USA The machine is a Tormach 770MX a model aimed unashamedly at the high end of the hobbyist market and certainly attracting the attention of small independent manufacturing start ups particularly in the United States This book records his journey of getting to grips with assembling all the components and learning how to operate the machine It is purposely not an instruction manual the manufacturer has already seen to that need It is more a chronological log of all processes from choosing the right machine through to getting it to make parts Taking the not insignificant leap from manual machining to CNC manufacturing in the domestic environment is a steep learning curve and this book is intended to assist with many top tips gleaned from learning the hard way shared throughout There are other excellent books out there some mainly theoretical references some siding with historical interest The author envisaged a need for something more practical and hands on When he began his project he couldn't find a book like this *Thomas Register of American Manufacturers* ,2003 Vols for 1970-71 includes manufacturers catalogs

Thomas Register ,2004 *Advanced Systems for Manufacturing* Manufacturing Systems Program (National Science Foundation),1985 **Engineering Materials and Design** ,1988 Eureka ,1991 **Machine Design** ,2008
