Coal is a fossil fuel that is formed from the remains of plants that lived and died millions of years ago. It is a solid, black, sedimentary rock that is used to produce electricity and heat. Coal is one of the most abundant and widely used energy sources in the world.

The coal industry in Illinois is a major part of the state's economy. It is one of the largest coal-producing states in the United States. The industry is responsible for the production of coal, which is then transported to power plants and other industrial facilities. The industry also provides jobs for many people in the state.
