As soon as the rollers are in place, they should be turned so that they are in the position shown in the drawing. If it is necessary to turn the rollers, they should be turned in the direction of the arrow.

It is an interesting question whether the model is a good approximation of the real world. The model is based on the assumption that the system is in a steady state. In reality, the system is always changing, and the model may not be able to capture all the dynamics of the system.
