

Guide to Basic Car Care

Advice for knowing your way around your vehicle and under the hood

TIRE PRESSURE

Locate the proper tire pressure as recommended by the manufacturer. Make sure to keep a working gauge on hand.

Why? Proper tire pressure helps to maximize fuel economy, vehicle stability (safety), traction, tire wear and overall tire life.

WIPER BLADES

Look for signs of cracking and wear on the blades and windshield. Only use the recommended length of blade for the vehicle you're driving.

Why? Damaged wipers can inhibit vision and lead to poor driving decisions.

SERPENTINE BELT

Located under the hood, the serpentine belt is usually checked by a technician during service. See if it looks worn and examine how many cracks per inch it has. **Why?** A broken belt can cause engine damage. You want to catch wear and tear early.

ENGINE OIL

Locate and measure the oil level on the dipstick. Only use the recommended oil type and weight, you can find this information located on the engine oil cap. **Why?** The right oil maintains the engine's working order and longevity.

WORKING FRONT AND REAR BRAKE LIGHTS

Turn on all lights, including the hazard lights. Do a vehicle walk around to check if all are functioning properly. **Why?** Other drivers need to see you and if your indicators aren't working they won't know your intentions.

CABIN FILTER

Found under the hood and outside the air intake, or under the dash, the filter needs to be free and clear to work properly. This maintenance is usually done at vehicle service intervals. **Why?** The filter keeps the air inside the car clean and healthy.

WINDSHIELD WIPER FLUID

Locate the windshield washer container, check the level with the cap dipstick. Only add windshield washer fluid, never water. **Why?** When you need it, you need it right away and not once you've started your journey...and water freezes.

BATTERY LEVEL

Batteries marked maintenance free are not designed to be opened. Check for any corrosion at battery terminals. Turn on the engine and make sure it cranks over properly. **Why?** You can't start your car without it and if your battery is performing poorly, it will most likely let you down when you need it most.

CHANGING A TIRE

Find a level area to change your tire and always work away from moving vehicles and traffic. Make sure the spare tire has air in it and that you have all of the tools needed to make the change. **Why?** You never know when you'll need to change a tire and you want to make sure you can do it safely and quickly.

FRONT AND REAR DEFROSTERS

Make sure that the front fan is blowing warm air at a set speed. Check to ensure the rear window element is defrosting the entire grid area. **Why?** When the defrosters don't work, it can make getting out of the vehicle difficult and unsafe.
