

Carbon Monoxide Detector Manual (SSCO1)

Introduction

The SSCO1 wireless carbon monoxide (CO) detector monitors the level of CO gas in your home and gives early warning when a potentially dangerous level exists. It does not detect fire, smoke or any other gas. If a dangerous concentration of CO is detected, the signal on the front of the detector goes on and an internal alarm sounds. After a longer following it beeps. The built-in warning transmission can give others (not SimpliSafe Alarm System users) around the area automatically notify other CO or fire danger detected.

The CO detector also monitors low battery, and correct, and sensor end of life conditions. These trouble conditions will cause an audible ring from the CO detector as described in the "Operating Modes" section below.

The SSCO1 is intended for residential indoor applications and other areas approved by the authority having jurisdiction (AHC). It is not intended for use in industrial applications.

CO Detector Location

CO detectors should be installed in or near bedrooms and living areas. Make sure you can hear the alarm from all sleeping areas. If you install only one CO alarm in your home install it near bedrooms, not in the basement or furnace room. For maximum protection, install only carbon-monoxide sleeping areas and one each level of your home.

Recommended Location

Locations to Avoid

The avoid mounting detectors in the unit, to provide optimum performance, and to prevent unnecessary nuisance alarms:

- 1. Do not install in bedrooms, garages, or furnace rooms.
- 2. Do not install in areas where the temperature is either less than 40°F or more than 100°F (5°C or 38°C).
- 3. Do not install where fire, or heating or cooling equipment (furnace/boiler) is located, to prevent nuisance alarms.

- 4. Do not install near vents, duct openings, or air conditioning or ventilation openings.
- 5. Do not install on walls or ceilings. Avoid mounting in areas with a large quantity of dust or exhaust fumes.
- 6. Do not install near ceiling fans, doors, windows, or other objects exposed to the weather.
- 7. Do not install close to spaces, such as gaps, or drilled ceilings or plaster walls, where CO may not reach the sensor in time to provide early warning.
- 8. Do not place the alarm where drapes, furniture, or other objects block the flow of air to the sensor.
- 9. Do not install near paint fumes from latex.

Installing the CO Detector

Mount the CO Detector on a ceiling or wall.

1. Remove the mounting bracket from your unit by twisting it counterclockwise.
2. Mount the bracket to the ceiling or wall using the included screws and wall anchors.
3. Push the CO Detector into the mounting bracket and push it clockwise until it clicks into place. Push against the alarm to make sure it is securely attached.

Battery Installation and Replacement

The unit will replace the battery in this alarm.

1. Press the management button and flip open the battery cover to access the battery compartment.
