## THESE EXERCISES

This programme has specific exercises to strengthen the muscles of your forearm and hand, to treat and also prevent Carpal Tunnel Syndrome. These exercises should be done at least once a day, or preferably twice a day time permitting. It is important to ensure the exercises are performed with good technique and control. We

have given suggested sets and repetitions. Remember everyone is different so your therapist may give guidance that is more specific to you.

The stretches are also performed to mobilise the tissues and joints, these can be done repeatedly during the day.
