Carter Center Lecture Notes:

Educating Health Professionals in Low-Resource Countries Joyce P. Murray, 2011 The shortage of adequately prepared health professionals is the most significant threat to world health that we face This book a co publication with The Carter Center focuses on the training of health professional educators both teachers and practitioners in low resource countries at different levels of technological and material sophistication This comprehensive book trains health educators and practitioners to improve their pedagogical skills and to increase the quality and numbers of health workers It also assists physicians nurses health officers medical lab technicians and environmental technicians to work with different cultures and linguistic groups in any one country For the growing number of health educators and practitioners in developed countries who teach research and practice within the international context it is an essential resource Key Features Preface by former US President Jimmy Carter Offers teaching and learning methods evaluated and field tested through The Carter Center's Ethiopia Public Health Training Initiative with positive results in over 500 health care centers Provides both teaching and learning strategies for countries and cultures at different levels of technological and material development Presents research based theories evidence based models and critical thinking skills through active teaching and learning strategies Highlights faculty leadership in developing interdisciplinary teams and educational outcomes

Maternal Health Services Utilization in Sub-Saharan Africa, vol I Tafadzwa Dzinamarira, Grant Murewanhema, Mambo Claude Muvunyi, 2025-11-13 Maternal health is a global priority and significant progress has been made in reducing maternal mortality rates in recent decades However disparities persist with Sub Saharan Africa and South Asia accounting for the majority of maternal deaths worldwide Maternal health services are essential for reducing maternal mortality and improving maternal outcomes However a number of factors including individual household community and health system factors can affect whether or not women use these services In resource limited settings a number of factors can affect whether or not women use maternal health services These factors include individual characteristics such as age education level income employment status and marital status household factors such as income number of children and decision making power community factors such as distance to health facilities quality of care cost of services and attitudes towards maternal health and health system factors such as availability of skilled health workers essential drugs and supplies and emergency obstetric care
